Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-8, and 13-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Geyser (382257).

Geyser discloses an apparatus having a rounded head (fig.2) and guide means, a stabilizing skirt or stabilizing means (8), an attachment mechanism (fig.2 and (9&10&x)) and/or buffering means. In regard to the buffering means this limitation is being read not to include the shock absorbing means which in the specification incidentally defines the buffering means. The term feathered is defined as to what the specific structure is supposed to be so the art will read on it.

The method is merely the natural use of the apparatus as claimed.

Allowable Subject Matter

3. Claims 9-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hodgman, Muson sr, Brockelsby III, and Grey et al disclose an invention.
